

CHAPTER 4

AN ACT concerning pensions payable to certain retirants from the Consolidated Police and Firemen's Pension Fund, the Police and Firemen's Retirement System of New Jersey, and the Public Employees' Retirement System of New Jersey, amending R.S.43:16-1, P.L.1944, c.255, P.L.1954, c.84 and P.L.1964, c.241 and supplementing P.L.1955, c.257 (C.43:15A-97 et seq.) and P.L.1958, c.143 (C.43:3B-1 et seq.).

BE IT ENACTED by the Senate and General Assembly of the State of New Jersey:

1. R.S.43:16-1 is amended to read as follows:

Retirement for age and service.

43:16-1. a. In all municipalities any active member of a police department or of a paid or part-paid fire department or of a county police department including active members of the paid or part-paid fire department of any fire district located in any township which has adopted the provisions of an act entitled "An act providing for the retirement of policemen and firemen of the police and fire departments in municipalities of this State, including all police officers having supervision or regulation of traffic upon county roads, and providing a pension for such retired policemen and firemen and members of the police and fire departments, and the widows, children and sole dependent parents of deceased members of said department," approved April 15, 1920 (P.L.1920, c.160) or of chapter 16 of Title 43 of the Revised Statutes, who shall have served honorably in the police or fire department for a period of 25 years, or any employee member of any such department who shall have served honorably in such department for a period of 25 years and who has reached the age of 60 years shall, on his own application, be retired on a service retirement pension equal to 60% of his final compensation. Any active member of the police or paid or part-paid fire department including active members of the paid or part-paid fire department of any fire district as aforesaid who shall have served honorably for a period of 25 years and reached the age of 65 years and any employee member of any such department who shall have served honorably in such department for a period of 25 years and reached the age of 70 years shall be retired on a service retirement pension equal to 60% of his final compensation.

The amount of the service retirement pension of any member of such police or paid or part-paid fire department, who has served for more than 25 years and who retires after August 8, 1984, shall be increased by an amount equal to 1% of his final compensation for each year of service in excess of 25 years but not more than 30 years and 1% of his final compensation for each year of service in excess of 30 years rendered prior to his reaching age 65.

b. The service retirement pension payable under subsection a. of this section to any person who served honorably in a police or fire department for a period of 25 years and retired from the service of the department prior to the effective date of this act, P.L.2001, c.4, shall be increased by an amount equal to 5% of the person's final compensation or by such lesser amount as would, if added to the pension payable at the time of retirement, provide a total service retirement pension of 70% of final compensation. The provisions of this subsection shall not be construed either to require a reduction in the pension payable to any retirant or to provide for the payment of any adjustment in such a benefit with respect to any period of time prior to the first day of the month following that effective date. The State shall be liable for any increased cost to local government employers participating in the Consolidated Police and Firemen's Pension Fund as a result of the increased benefit provided for in this subsection.

2. Section 16 of P.L.1964, c.241 (C.43:16A-11.1) is amended to read as follows:

C.43:16A-11.1 Special retirement; resignation with 25 years of creditable service; allowance; death benefit.

16. a. Should a member resign after having established 25 years of creditable service, he may elect "special retirement," provided, that such election is communicated by such member to the retirement system by filing a written application, duly attested, stating at what time subsequent to the execution and filing thereof he desires to be retired. He shall receive, in lieu of the payment provided in section 11, a retirement allowance which shall consist of:

- (1) An annuity which shall be the actuarial equivalent of his aggregate contributions, and
- (2) A pension in the amount which, when added to the member's annuity, will provide a total

retirement allowance of 65% of his final compensation, plus 1% of his final compensation multiplied by the number of years of creditable service over 25 but not over 30; provided, however, that any member who has earned, prior to July 1, 1979, more than 30 years of creditable service, shall receive an additional 1% of his final compensation for each year of his creditable service over 30.

The board of trustees shall retire him at the time specified or at such other time within one month after the date so specified as the board finds advisable.

Upon the receipt of proper proofs of the death of such a retired member, there shall be paid to his beneficiary an amount equal to one-half of the final compensation received by the member.

b. The "special retirement" allowance payable under subsection a. of this section to any person who retired under the retirement system prior to December 20, 1989 shall be increased by an amount equal to 5% of the person's final compensation or by such lesser amount as would, if added to the allowance payable at the time of retirement, provide a total retirement allowance of 70% of final compensation, except that in the case of such a retirant who retired on or after July 1, 1979 and had earned prior to that date more than 30 years of creditable service, the amount of the increase shall be equal to 5% of the person's final compensation irrespective of the total retirement allowance which such an increase would provide. The provisions of this subsection shall not be construed either to require a reduction in the retirement allowance payable to any retirant or to provide for the payment of any adjustment in such an allowance with respect to any period of time prior to the first day of the month following that effective date.

3. Section 15 of P.L.1944, c.255 (C.43:16A-15) is amended to read as follows:

C.43:16A-15 Contributions, expenses of administration.

15. (1) The contributions required for the support of the retirement system shall be made by members and their employers.

(2) The uniform percentage contribution rate for members shall be 8.5% of compensation.

(3) (Deleted by amendment, P.L.1989, c.204).

(4) Upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall compute annually, beginning as of June 30, 1991, the amount of contribution which shall be the normal cost as computed under the projected unit credit method attributable to service rendered under the retirement system for the year beginning on July 1 immediately succeeding the date of the computation. This shall be known as the "normal contribution."

(5) (Deleted by amendment, P.L.1989, c.204).

(6) (Deleted by amendment, P.L.1994, c.62.)

(7) Each employer shall cause to be deducted from the salary of each member the percentage of earnable compensation prescribed in subsection (2) of this section. To facilitate the making of deductions, the retirement system may modify the amount of deduction required of any member by an amount not to exceed 1/10 of 1% of the compensation upon which the deduction is based.

(8) The deductions provided for herein shall be made notwithstanding that the minimum salary provided for by law for any member shall be reduced thereby. Every member shall be deemed to consent and agree to the deductions made and provided for herein, and payment of salary or compensation less said deduction shall be a full and complete discharge and acquittance of all claims and demands whatsoever for the service rendered by such person during the period covered by such payment, except as to the benefits provided under this act. The chief fiscal officer of each employer shall certify to the retirement system in such manner as the retirement system may prescribe, the amounts deducted; and when deducted shall be paid into said annuity savings fund, and shall be credited to the individual account of the member from whose salary said deduction was made.

(9) With respect to employers other than the State, upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall compute the amount of the accrued liability as of June 30, 1991 under the projected unit credit method, which is not

already covered by the assets of the retirement system, valued in accordance with the asset valuation method established in this section. Using the total amount of this unfunded accrued liability, the actuary shall compute the initial amount of contribution which, if the contribution is increased at a specific rate and paid annually for a specific period of time, will amortize this liability. The State Treasurer shall determine, upon the advice of the Director of the Division of Pensions and Benefits, the board of trustees and the actuary, the rate of increase for the contribution and the time period for full funding of this liability, which shall not exceed 40 years on initial application of this section as amended by this act, P.L.1994, c.62. This shall be known as the "accrued liability contribution." Any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for the 10 valuation years following valuation year 1991 shall serve to increase or decrease, respectively, the unfunded accrued liability contribution. Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 30 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 30 years, the accrued liability contribution shall be computed for the valuation year in the same manner provided for the computation of the initial accrued liability contribution under this section.

With respect to the State, upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall annually determine if there is an amount of the accrued liability, computed under the projected unit credit method, which is not already covered by the assets of the retirement system, valued in accordance with the asset valuation method established in this section. This shall be known as the "unfunded accrued liability." If there was no unfunded accrued liability for the valuation period immediately preceding the current valuation period, the actuary, using the total amount of this unfunded accrued liability, shall compute the initial amount of contribution which, if the contribution is increased at a specific rate and paid annually for a specific period of time, will amortize this liability. The State Treasurer shall determine, upon the advice of the Director of the Division of Pensions and Benefits, the board of trustees and the actuary, the rate of increase for the contribution and the time period for full funding of this liability, which shall not exceed 30 years. This shall be known as the "accrued liability contribution." Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 30 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 30 years, the accrued liability contribution shall be computed for the valuation year in the same manner provided for the computation of the initial accrued liability contribution under this section. The State may pay all or any portion of its unfunded accrued liability under the retirement system from any source of funds legally available for the purpose, including, without limitation, the proceeds of bonds authorized by law for this purpose.

The value of the assets to be used in the computation of the contributions provided for under this section for valuation periods shall be the value of the assets for the preceding valuation period increased by the regular interest rate, plus the net cash flow for the valuation period (the difference between the benefits and expenses paid by the system and the contributions to the system) increased by one half of the regular interest rate, plus 20% of the difference between this expected value and the full market value of the assets as of the end of the valuation period. This shall be known as the "valuation assets." Notwithstanding the first sentence of this paragraph, the valuation assets for the valuation period ending June 30, 1995 shall be the full market value of the assets as of that date and, with respect to the valuation assets allocated to the State, shall include the proceeds from the bonds issued pursuant to the "Pension Bond Financing Act of 1997," P.L.1997, c.114 (C.34:1B-7.45 et seq.), paid to the system by the New Jersey Economic Development Authority to fund the unfunded accrued liability of the system. Notwithstanding the first sentence of this paragraph, the percentage of the difference between the expected value and the full market value of the assets to be added to the expected value of the assets for the valuation period ending June 30, 1998 for the State shall be 100% and for other employers shall

be 57%. Notwithstanding the first sentence of this paragraph, the amount of the difference between the expected value and the full market value of the assets to be added to the expected value of the assets for the valuation period ending June 30, 1999 shall include an additional amount of the market value of the assets sufficient to fund the unfunded accrued liability for the supplementary "special retirement" allowances provided under subsection b. of section 16 of P.L.1964, c.241 (C.43:16A-11.1).

"Excess valuation assets" means, with respect to the valuation assets allocated to the State, the valuation assets allocated to the State for a valuation period less the actuarial accrued liability of the State for the valuation period, and beginning with the valuation period ending June 30, 1998, less the present value of the expected additional normal cost contributions attributable to the provisions of P.L.1999, c.428 (C.43:16A-15.8 et al.) payable on behalf of the active members employed by the State as of the valuation period over the expected working lives of the active members in accordance with the tables of actuarial assumptions applicable to the valuation period, if the sum is greater than zero. "Excess valuation assets" means, with respect to the valuation assets allocated to other employers, the valuation assets allocated to the other employers for a valuation period less the actuarial accrued liability of the other employers for the valuation period, excluding the unfunded accrued liability for early retirement incentive benefits pursuant to P.L.1993, c.99 for the other employers, and beginning with the valuation period ending June 30, 1998, less the present value of the expected additional normal cost contributions attributable to the provisions of P.L.1999, c.428 (C.43:16A-15.8 et al.) payable on behalf of the active members employed by other employers as of the valuation period over the expected working lives of the active members in accordance with the tables of actuarial assumptions applicable to the valuation period, if the sum is greater than zero.

If there are excess valuation assets allocated to the State or to the other employers for the valuation period ending June 30, 1995, the normal contributions payable by the State or by the other employers for the valuation periods ending June 30, 1995, and June 30, 1996 which have not yet been paid to the retirement system shall be reduced to the extent possible by the excess valuation assets allocated to the State or to the other employers, respectively, provided that with respect to the excess valuation assets allocated to the State, the General Fund balances that would have been paid to the retirement system except for this provision shall first be allocated as State aid to public schools to the extent that additional sums are required to comply with the May 14, 1997 decision of the New Jersey Supreme Court in *Abbott v. Burke*.

If there are excess valuation assets allocated to the other employers for the valuation period ending June 30, 1998, the accrued liability contributions payable by the other employers for the valuation period ending June 30, 1997 shall be reduced to the extent possible by the excess valuation assets allocated to the other employers.

If there are excess valuation assets allocated to the State or to the other employers for a valuation period ending after June 30, 1998, the State Treasurer may reduce the normal contribution payable by the State or by other employers for the next valuation period as follows:

(1) for valuation periods ending June 30, 1996 through June 30, 2000, to the extent possible by up to 100% of the excess valuation assets allocated to the State or to the other employers, respectively;

(2) for the valuation period ending June 30, 2001, to the extent possible by up to 84% of the excess valuation assets allocated to the State or to the other employers, respectively;

(3) for the valuation period ending June 30, 2002, to the extent possible by up to 68% of the excess valuation assets allocated to the State or to the other employers, respectively; and

(4) for valuation periods ending on or after June 30, 2003, to the extent possible by up to 50% of the excess valuation assets allocated to the State or to the other employers, respectively.

The normal and accrued liability contributions shall be certified annually by the retirement system and shall be included in the budget of the employer and levied and collected in the same manner as any other taxes are levied and collected for the payment of the salaries of members.

(10) The treasurer or corresponding officer of the employer shall pay to the State Treasurer no later than April 1 of the State's fiscal year in which payment is due the amount so certified as payable by the employer, and shall pay monthly to the State Treasurer the amount of the deductions from the salary of the members in the employ of the employer, and the State

Treasurer shall credit such amount to the appropriate fund or funds, of the retirement system.

If payment of the full amount of the employer's obligation is not made within 30 days of the due date established by this act, interest at the rate of 10% per annum shall commence to run against the unpaid balance thereof on the first day after such 30th day.

If payment in full, representing the monthly transmittal and report of salary deductions, is not made within 15 days of the due date established by the retirement system, interest at the rate of 10% per annum shall commence to run against the total transmittal of salary deductions for the period on the first day after such 15th day.

(11) The expenses of administration of the retirement system shall be paid by the State of New Jersey. Each employer shall reimburse the State for a proportionate share of the amount paid by the State for administrative expense. This proportion shall be computed as the number of members under the jurisdiction of such employer bears to the total number of members in the system. The pro rata share of the cost of administrative expense shall be included with the certification by the retirement system of the employer's contribution to the system.

(12) Notwithstanding anything to the contrary, the retirement system shall not be liable for the payment of any pension or other benefits on account of the employees or beneficiaries of any employer participating in the retirement system, for which reserves have not been previously created from funds, contributed by such employer or its employees for such benefits.

(13) (Deleted by amendment, P.L.1992, c.125.)

(14) Commencing with valuation year 1991, with payment to be made in Fiscal Year 1994, the Legislature shall annually appropriate and the State Treasurer shall pay into the pension accumulation fund of the retirement system an amount equal to 1.1% of the compensation of the members of the system for the valuation year to fund the benefits provided by section 16 of P.L.1964, c.241 (C.43:16A-11.1), as amended by P.L.1979, c.109.

(15) If the valuation assets are insufficient to fund the normal and accrued liability costs attributable to P.L.1999, c.428 (C.43:16A-15.8 et al.) as provided hereinabove, the normal and unfunded accrued liability contributions required to fund these costs for the State and other employers shall be paid by the State.

C.43:15A-100.1. Supplementary "special" retirement allowance to certain retired law enforcement officers.

4. a. Should a law enforcement officer member retire after having established 25 years of creditable service, the member shall receive, in addition to the service retirement allowance provided in section 4 of P.L.1955, c.257 (C.43:15A-100), a supplementary "special" retirement allowance equal to 5% of the member's final compensation or such lesser amount as will, if added to the member's service retirement allowance, provide a total retirement allowance of 70% of the member's final compensation.

b. The supplementary "special" retirement allowance provided under subsection a. of this section shall be payable to any former member of the retirement system who, prior to the effective date of this act, P.L.2001, c.4, retired as a law enforcement officer member of the retirement system after having established 25 years of creditable service. The provisions of this subsection shall not be construed either to require a reduction in the retirement allowance payable to any retiree or to provide for the payment of any adjustment in such an allowance with respect to any period of time prior to the first day of the month following that effective date.

5. Section 24 of P.L.1954, c.84 (C.43:15A-24) is amended to read as follows:

C.43:15A-24 Contingent reserve fund.

24. The contingent reserve fund shall be the fund in which shall be credited contributions made by the State and other employers.

a. Upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall compute annually, beginning as of March 31, 1992, the amount of contribution which shall be the normal cost as computed under the projected unit credit method attributable to service rendered under the retirement system for the year beginning on

July 1 immediately succeeding the date of the computation. This shall be known as the "normal contribution."

b. With respect to employers other than the State, upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall compute the amount of the accrued liability of the retirement system as of March 31, 1992 under the projected unit credit method, excluding the liability for pension adjustment benefits for active employees funded pursuant to section 2 of P.L.1990, c.6 (C.43:15A-24.1), which is not already covered by the assets of the retirement system, valued in accordance with the asset valuation method established in this section. Using the total amount of this unfunded accrued liability, the actuary shall compute the initial amount of contribution which, if the contribution is increased at a specific rate and paid annually for a specific period of time, will amortize this liability. The State Treasurer shall determine, upon the advice of the Director of the Division of Pensions and Benefits, the board of trustees and the actuary, the rate of increase for the contribution and the time period for full funding of this liability, which shall not exceed 40 years on initial application of this section as amended by this act, P.L.1994, c.62. This shall be known as the "accrued liability contribution." Any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for the 10 valuation years following valuation year 1992 shall serve to increase or decrease, respectively, the unfunded accrued liability contribution. Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 30 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 30 years, the accrued liability contribution shall be computed for the valuation year in the same manner provided for the computation of the initial accrued liability contribution under this section.

With respect to the State, upon the basis of the tables recommended by the actuary which the commission adopts and regular interest, the actuary shall annually determine if there is an amount of the accrued liability of the retirement system, computed under the projected unit credit method, which is not already covered by the assets of the retirement system, valued in accordance with the asset valuation method established in this section. This shall be known as the "unfunded accrued liability." If there was no unfunded accrued liability for the valuation period immediately preceding the current valuation period, the actuary, using the total amount of this unfunded accrued liability, shall compute the initial amount of contribution which, if the contribution is increased at a specific rate and paid annually for a specific period of time, will amortize this liability. The State Treasurer shall determine, upon the advice of the Director of the Division of Pensions and Benefits, the commission and the actuary, the rate of increase for the contribution and the time period for full funding of this liability, which shall not exceed 30 years. This shall be known as the "accrued liability contribution." Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 30 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 30 years, the accrued liability contribution shall be computed for the valuation year in the same manner provided for the computation of the initial accrued liability contribution under this section. The State may pay all or any portion of its unfunded accrued liability under the retirement system from any source of funds legally available for the purpose. including, without limitation, the proceeds of bonds authorized by law for this purpose.

The value of the assets to be used in the computation of the contributions provided for under this section for valuation periods shall be the value of the assets for the preceding valuation period increased by the regular interest rate, plus the net cash flow for the valuation period (the difference between the benefits and expenses paid by the system and the contributions to the system) increased by one half of the regular interest rate, plus 20% of the difference between this expected value and the full market value of the assets as of the end of the valuation period. This shall be known as the "valuation assets." Notwithstanding the first sentence of this paragraph, the valuation assets for the valuation period ending March 31, 1996 shall be the full market value

of the assets as of that date and, with respect to the valuation assets allocated to the State, shall include the proceeds from the bonds issued pursuant to the "Pension Bond Financing Act of 1997," P.L.1997, c.114 (C.34:1B-7.45 et seq.), paid to the system by the New Jersey Economic Development Authority to fund the unfunded accrued liability of the system. Notwithstanding the first sentence of this paragraph, the amount of the difference between the expected value and the full market value of the assets to be added to the expected value of the assets for the valuation period ending June 30, 1999 shall include an additional amount of the market value of the assets sufficient to fund the unfunded accrued liability for the supplementary "special" retirement allowances provided under section 4 of P.L.2001, c.4 (C.43:15A-100.1).

"Excess valuation assets" for a valuation period means, with respect to the valuation assets allocated to the State:

- (1) the valuation assets allocated to the State; less
- (2) the actuarial accrued liability of the State for basic benefits and pension adjustment benefits under the retirement system; less
- (3) the contributory group insurance premium fund, created by section 4 of P.L.1955, c.214 (C.43:15A-91), as amended by section 4 of P.L.1960, c.79; less
- (4) the post retirement medical premium fund, created pursuant to section 2 of P.L.1990, c.6 (C.43:15A-24.1), as amended by section 8 of P.L.1994, c.62; less
- (5) the present value of the projected total normal cost for pension adjustment benefits in excess of the projected total phased-in normal cost for pension adjustment benefits for the State authorized by section 2 of P.L.1990, c.6 (C.43:15A-24.1) over the full phase-in period, determined in the manner prescribed for the determination and amortization of the unfunded accrued liability of the system, if the sum of the foregoing items is greater than zero.

"Excess valuation assets" for a valuation period means, with respect to the valuation assets allocated to other employers:

- (1) the valuation assets allocated to the other employers; less
- (2) the actuarial accrued liability of the other employers for basic benefits and pension adjustment benefits under the retirement system, excluding the unfunded accrued liability for early retirement incentive benefits pursuant to P.L.1991, c.229, P.L.1991, c.230, P.L.1993, c.138, and P.L.1993, c.181, for employers other than the State; less
- (3) the contributory group insurance premium fund, created by section 4 of P.L.1955, c.214 (C.43:15A-91), as amended by section 4 of P.L.1960, c.79; less
- (4) the present value of the projected total normal cost for pension adjustment benefits in excess of the projected total phased-in normal cost for pension adjustment benefits for the other employers authorized by section 2 of P.L.1990, c.6 (C.43:15A-24.1) over the full phase-in period, determined in the manner prescribed for the determination and amortization of the unfunded accrued liability of the system, if the sum of the foregoing items is greater than zero.

If there are excess valuation assets allocated to the State or to the other employers for the valuation period ending March 31, 1996, the normal contributions payable by the State or by the other employers for the valuation periods ending March 31, 1996 and March 31, 1997 which have not yet been paid to the retirement system shall be reduced to the extent possible by the excess valuation assets allocated to the State or to the other employers, respectively, provided that with respect to the excess valuation assets allocated to the State, the General Fund balances that would have been paid to the retirement system except for this provision shall first be allocated as State aid to public schools to the extent that additional sums are required to comply with the May 14, 1997 decision of the New Jersey Supreme Court in *Abbott v. Burke*. If there are excess valuation assets allocated to the State or to the other employers for a valuation period ending after March 31, 1996, the State Treasurer may reduce the normal contribution payable by the State or by the other employers for the next valuation period as follows:

- (1) for valuation periods ending March 31, 1997 through March 31, 2001, to the extent possible by up to 100% of the excess valuation assets allocated to the State or to the other employers, respectively;
- (2) for the valuation period ending March 31, 2002, to the extent possible by up to 84% of the excess valuation assets allocated to the State or to the other employers,

respectively;

(3) for the valuation period ending March 31, 2003, to the extent possible by up to 68% of the excess valuation assets allocated to the State or to the other employers, respectively; and

(4) for valuation periods ending on or after March 31, 2004, to the extent possible by up to 50% of the excess valuation assets allocated to the State or to the other employers, respectively.

For calendar years 1998 and 1999, the rate of contribution of members of the retirement system under section 25 of P.L.1954, c.84 (C.43:15A-25) shall be reduced by 1/2 of 1% from excess valuation assets and for calendar years 2000 and 2001, the rate of contribution shall be reduced by 2% from excess valuation assets. Thereafter, the rate of contribution of members of the retirement system under that section for a calendar year shall be reduced equally with normal contributions to the extent possible, but not by more than 2%, from excess valuation assets if the State Treasurer determines that excess valuation assets shall be used to reduce normal contributions by the State and local employers for the fiscal year beginning immediately prior to the calendar year, or for the calendar year for local employers whose fiscal year is the calendar year, and excess valuation assets above the amount necessary to fund the reduction for that calendar year in the member contribution rate plus an equal reduction in the normal contribution shall be available for the further reduction of normal contributions, subject to the limitations prescribed by this subsection.

c. The retirement system shall certify annually the aggregate amount payable to the contingent reserve fund in the ensuing year, which amount shall be equal to the sum of the amounts described in this section. The State shall pay into the contingent reserve fund during the ensuing year the amount so determined. The death benefits, payable as a result of contribution by the State under the provisions of this chapter upon the death of an active or retired member, shall be paid from the contingent reserve fund.

d. The disbursements for benefits not covered by reserves in the system on account of veterans shall be met by direct contributions of the State and other employers.

C.43:3B-8.6 Inapplicability of C.43:3B-8 to P.L.2001, c.4.

6. The provisions of section 7 of P.L.1969, c.169 (C.43:3B-8) shall not apply to R.S.43:16-1 or section 16 of P.L.1964, c.241 (C.43:16A-11.1) as amended by P.L.2001, c.4 (C.43:15A-100.1 et al.), or to section 4 of that P.L.2001, c.4 (C.43:15A-100.1), and the annual cost of living adjustment received by retirants and beneficiaries under P.L.1958, c.143 (C.43:3B-1 et seq.) shall be calculated as of the date of the benefit year of the member of the appropriate pension fund or retirement system.

7. This act shall take effect on the 90th day following enactment.

Approved January 16, 2001.
