

## CHAPTER 108

**AN ACT** concerning the funding of the Public Employees' Retirement System of New Jersey, the funding and special retirement allowance of the Police and Firemen's Retirement System, amending P.L.1954, c.84, P.L.1964, c.241 and P.L.1944, c.255 and supplementing P.L.1976, c.68 (C.40A:4-45.1 et seq.).

**BE IT ENACTED** by the Senate and General Assembly of the State of New Jersey:

1. Section 24 of P.L.1954, c.84 (C.43:15A-24) is amended to read as follows:

C.43:15A-24 Contingent reserve fund.

24. The contingent reserve fund shall be the fund in which shall be credited contributions made by the State and other employers.

a. Upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall compute annually, beginning as of March 31, 1992, the amount of contribution which shall be the normal cost as computed under the projected unit credit method attributable to service rendered under the retirement system for the year beginning on July 1 immediately succeeding the date of the computation. This shall be known as the "normal contribution."

b. With respect to employers other than the State, upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall compute the amount of the accrued liability of the retirement system as of March 31, 1992 under the projected unit credit method, excluding the liability for pension adjustment benefits for active employees funded pursuant to section 2 of P.L.1990, c.6 (C.43:15A-24.1), which is not already covered by the assets of the retirement system, valued in accordance with the asset valuation method established in this section. Using the total amount of this unfunded accrued liability, the actuary shall compute the initial amount of contribution which, if the contribution is increased at a specific rate and paid annually for a specific period of time, will amortize this liability. The State Treasurer shall determine, upon the advice of the Director of the Division of Pensions and Benefits, the board of trustees and the actuary, the rate of increase for the contribution and the time period for full funding of this liability, which shall not exceed 40 years on initial application of this section as amended by this act, P.L.1994, c.62. This shall be known as the "accrued liability contribution." Any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for the 10 valuation years following valuation year 1992 shall serve to increase or decrease, respectively, the unfunded accrued liability contribution. Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 30 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 30 years, the accrued liability contribution shall be computed for the valuation year in the same manner provided for the computation of the initial accrued liability contribution under this section.

With respect to the State, upon the basis of the tables recommended by the actuary which the commission adopts and regular interest, the actuary shall annually determine if there is an amount of the accrued liability of the retirement system, computed under the projected unit credit method, which is not already covered by the assets of the retirement system, valued in accordance with the asset valuation method established in this section. This shall be known as the "unfunded accrued liability." If there was no unfunded accrued liability for the valuation period immediately preceding the current valuation period, the actuary, using the total amount of this unfunded accrued liability, shall compute the initial amount of contribution which, if the contribution is increased at a specific rate and paid annually for a specific period of time, will amortize this liability. The State Treasurer shall determine, upon the advice of the Director of the Division of Pensions and Benefits, the commission and the actuary, the rate of increase for the contribution and the time period for full funding of this liability, which shall not exceed 30 years. This shall be known as the "accrued liability contribution." Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed

30 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 30 years, the accrued liability contribution shall be computed for the valuation year in the same manner provided for the computation of the initial accrued liability contribution under this section. The State may pay all or any portion of its unfunded accrued liability under the retirement system from any source of funds legally available for the purpose, including, without limitation, the proceeds of bonds authorized by law for this purpose.

The value of the assets to be used in the computation of the contributions provided for under this section for valuation periods shall be the value of the assets for the preceding valuation period increased by the regular interest rate, plus the net cash flow for the valuation period (the difference between the benefits and expenses paid by the system and the contributions to the system) increased by one half of the regular interest rate, plus 20% of the difference between this expected value and the full market value of the assets as of the end of the valuation period. This shall be known as the "valuation assets." Notwithstanding the first sentence of this paragraph, the valuation assets for the valuation period ending March 31, 1996 shall be the full market value of the assets as of that date and, with respect to the valuation assets allocated to the State, shall include the proceeds from the bonds issued pursuant to the "Pension Bond Financing Act of 1997," P.L.1997, c.114 (C.34:1B-7.45 et seq.), paid to the system by the New Jersey Economic Development Authority to fund the unfunded accrued liability of the system. Notwithstanding the first sentence of this paragraph, the valuation assets for the valuation period ending June 30, 1999 shall be the full market value of the assets as of that date.

"Excess valuation assets" for a valuation period means, with respect to the valuation assets allocated to the State:

- (1) the valuation assets allocated to the State; less
- (2) the actuarial accrued liability of the State for basic benefits and pension adjustment benefits under the retirement system; less
- (3) the contributory group insurance premium fund, created by section 4 of P.L.1955, c.214 (C.43:15A-91), as amended by section 4 of P.L.1960, c.79; less
- (4) the post retirement medical premium fund, created pursuant to section 2 of P.L.1990, c.6 (C.43:15A-24.1), as amended by section 8 of P.L.1994, c.62; less
- (5) the present value of the projected total normal cost for pension adjustment benefits in excess of the projected total phased-in normal cost for pension adjustment benefits for the State authorized by section 2 of P.L.1990, c.6 (C.43:15A-24.1) over the full phase-in period, determined in the manner prescribed for the determination and amortization of the unfunded accrued liability of the system, if the sum of the foregoing items is greater than zero.

"Excess valuation assets" for a valuation period means, with respect to the valuation assets allocated to other employers:

- (1) the valuation assets allocated to the other employers; less
- (2) the actuarial accrued liability of the other employers for basic benefits and pension adjustment benefits under the retirement system, excluding the unfunded accrued liability for early retirement incentive benefits pursuant to P.L.1991, c.229, P.L.1991, c.230, P.L.1993, c.138, and P.L.1993, c.181, for employers other than the State; less
- (3) the contributory group insurance premium fund, created by section 4 of P.L.1955, c.214 (C.43:15A-91), as amended by section 4 of P.L.1960, c.79; less
- (4) the present value of the projected total normal cost for pension adjustment benefits in excess of the projected total phased-in normal cost for pension adjustment benefits for the other employers authorized by section 2 of P.L.1990, c.6 (C.43:15A-24.1) over the full phase-in period, determined in the manner prescribed for the determination and amortization of the unfunded accrued liability of the system, if the sum of the foregoing items is greater than zero.

If there are excess valuation assets allocated to the State or to the other employers for the valuation period ending March 31, 1996, the normal contributions payable by the State or by the other employers for the valuation periods ending March 31, 1996 and March 31, 1997 which have not yet been paid to the retirement system shall be reduced to the extent possible by the excess valuation assets allocated to the State or to the other employers, respectively, provided that with respect to the excess valuation assets allocated to the State, the General Fund balances that would have been paid to the retirement system except for this provision shall first be

allocated as State aid to public schools to the extent that additional sums are required to comply with the May 14, 1997 decision of the New Jersey Supreme Court in *Abbott v. Burke*. If there are excess valuation assets allocated to the State or to the other employers for a valuation period ending after March 31, 1996, the State Treasurer may reduce the normal contribution payable by the State or by the other employers for the next valuation period as follows:

(1) for valuation periods ending March 31, 1997 through March 31, 2001, to the extent possible by up to 100% of the excess valuation assets allocated to the State or to the other employers, respectively;

(2) for the valuation period ending March 31, 2002, to the extent possible by up to 84% of the excess valuation assets allocated to the State or to the other employers, respectively;

(3) for the valuation period ending March 31, 2003, to the extent possible by up to 68% of the excess valuation assets allocated to the State or to the other employers, respectively; and

(4) for valuation periods ending on or after March 31, 2004, to the extent possible by up to 50% of the excess valuation assets allocated to the State or to the other employers, respectively.

For calendar years 1998 and 1999, the rate of contribution of members of the retirement system under section 25 of P.L.1954, c.84 (C.43:15A-25) shall be reduced by 1/2 of 1% from excess valuation assets and for calendar years 2000 and 2001, the rate of contribution shall be reduced by 2% from excess valuation assets. Thereafter, the rate of contribution of members of the retirement system under that section for a calendar year shall be reduced equally with normal contributions to the extent possible, but not by more than 2%, from excess valuation assets if the State Treasurer determines that excess valuation assets shall be used to reduce normal contributions by the State and local employers for the fiscal year beginning immediately prior to the calendar year, or for the calendar year for local employers whose fiscal year is the calendar year, and excess valuation assets above the amount necessary to fund the reduction for that calendar year in the member contribution rate plus an equal reduction in the normal contribution shall be available for the further reduction of normal contributions, subject to the limitations prescribed by this subsection.

If there are excess valuation assets after reductions in normal contributions and member contributions as authorized in the preceding paragraphs for a valuation period beginning with the valuation period ending June 30, 1999, an amount of excess valuation assets not to exceed the amount of the member contributions for the fiscal year in which the normal contributions are payable shall be credited to the benefit enhancement fund. The amount of excess valuation assets credited to the benefit enhancement fund shall not exceed the present value of the expected additional normal contributions attributable to the provisions of P.L.2001, c.133 payable on behalf of the active members over the expected working lives of the active members in accordance with the tables of actuarial assumptions for the valuation period. No additional excess valuation assets shall be credited to the benefit enhancement fund after the maximum amount is attained. Interest shall be credited to the benefit enhancement fund as provided under section 33 of P.L.1954, c.84 (C.43:15A-33).

The normal contribution for the increased benefits for active employees under P.L.2001, c.133 shall be paid from the benefit enhancement fund. If assets in the benefit enhancement fund are insufficient to pay the normal contribution for the increased benefits for a valuation period, the State shall pay the amount of normal contribution for the increased benefits not covered by assets from the benefit enhancement fund.

c. The retirement system shall certify annually the aggregate amount payable to the contingent reserve fund in the ensuing year, which amount shall be equal to the sum of the amounts described in this section.

The State Treasurer shall reduce the normal and accrued liability contributions payable by employers other than the State, excluding the contribution payable from the benefit enhancement fund, to a percentage of the amount certified annually by the retirement system, which percentage shall be: for payments due in the State fiscal year ending June 30, 2005, 20%; for payments due in the State fiscal year ending June 30, 2006, not more than 40%; for payments due in the State fiscal year ending June 30, 2007, not more than 60%; and for payments due in the State fiscal year ending June 30, 2008, not more than 80%.

The State shall pay into the contingent reserve fund during the ensuing year the amount so

determined. The death benefits, payable as a result of contribution by the State under the provisions of this chapter upon the death of an active or retired member, shall be paid from the contingent reserve fund.

d. The disbursements for benefits not covered by reserves in the system on account of veterans shall be met by direct contributions of the State and other employers.

2. Section 16 of P.L.1964, c.241 (C.43:16A-11.1) is amended to read as follows:

C.43:16A-11.1 Special retirement; resignation with 25 years of creditable service; allowance; death benefit.

16. a. Should a member resign after having established 25 years of creditable service, he may elect "special retirement," provided, that such election is communicated by such member to the retirement system by filing a written application, duly attested, stating at what time subsequent to the execution and filing thereof he desires to be retired. He shall receive, in lieu of the payment provided in section 11, a retirement allowance which shall consist of:

- (1) An annuity which shall be the actuarial equivalent of his aggregate contributions, and
- (2) A pension in the amount which, when added to the member's annuity, will provide a total retirement allowance of 65% of his final compensation, plus 1% of his final compensation multiplied by the number of years of creditable service over 25 but not over 30; or, beginning in the fiscal year immediately following the adoption of the valuation report by the retirement system board of trustees in which the funded level is in excess of 104%, a pension in the amount which, when added to the member's annuity, will provide a total retirement allowance of 70% of final compensation, plus 1% of final compensation multiplied by the number of years of creditable service over 25 but not over 30; provided, however, that any member who has earned, prior to July 1, 1979, more than 30 years of creditable service, shall receive an additional 1% of his final compensation for each year of his creditable service over 30.

The board of trustees shall retire him at the time specified or at such other time within one month after the date so specified as the board finds advisable.

Upon the receipt of proper proofs of the death of such a retired member, there shall be paid to his beneficiary an amount equal to one-half of the final compensation received by the member.

b. The "special retirement" allowance payable under subsection a. of this section to any person who retired under the retirement system prior to December 20, 1989 shall be increased by an amount equal to 5% of the person's final compensation or by such lesser amount as would, if added to the allowance payable at the time of retirement, provide a total retirement allowance of 70% of final compensation, except that in the case of such a retirant who retired on or after July 1, 1979 and had earned prior to that date more than 30 years of creditable service, the amount of the increase shall be equal to 5% of the person's final compensation irrespective of the total retirement allowance which such an increase would provide. The provisions of this subsection shall not be construed either to require a reduction in the retirement allowance payable to any retirant or to provide for the payment of any adjustment in such an allowance with respect to any period of time prior to the first day of the month following that effective date.

3. Section 15 of P.L.1944, c.255 (C.43:16A-15) is amended to read as follows:

C.43:16A-15 Contributions, expenses of administration.

15. (1) The contributions required for the support of the retirement system shall be made by members and their employers.

(2) The uniform percentage contribution rate for members shall be 8.5% of compensation.

(3) (Deleted by amendment, P.L.1989, c.204).

(4) Upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall compute annually, beginning as of June 30, 1991, the amount of contribution which shall be the normal cost as computed under the projected unit credit method attributable to service rendered under the retirement system for the year beginning on July 1 immediately succeeding the date of the computation. This shall be known as the "normal

contribution."

(5) (Deleted by amendment, P.L.1989, c.204).

(6) (Deleted by amendment, P.L.1994, c.62.)

(7) Each employer shall cause to be deducted from the salary of each member the percentage of earnable compensation prescribed in subsection (2) of this section. To facilitate the making of deductions, the retirement system may modify the amount of deduction required of any member by an amount not to exceed 1/10 of 1% of the compensation upon which the deduction is based.

(8) The deductions provided for herein shall be made notwithstanding that the minimum salary provided for by law for any member shall be reduced thereby. Every member shall be deemed to consent and agree to the deductions made and provided for herein, and payment of salary or compensation less said deduction shall be a full and complete discharge and acquittance of all claims and demands whatsoever for the service rendered by such person during the period covered by such payment, except as to the benefits provided under this act. The chief fiscal officer of each employer shall certify to the retirement system in such manner as the retirement system may prescribe, the amounts deducted; and when deducted shall be paid into said annuity savings fund, and shall be credited to the individual account of the member from whose salary said deduction was made.

(9) With respect to employers other than the State, upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall compute the amount of the accrued liability as of June 30, 1991 under the projected unit credit method, which is not already covered by the assets of the retirement system, valued in accordance with the asset valuation method established in this section. Using the total amount of this unfunded accrued liability, the actuary shall compute the initial amount of contribution which, if the contribution is increased at a specific rate and paid annually for a specific period of time, will amortize this liability. The State Treasurer shall determine, upon the advice of the Director of the Division of Pensions and Benefits, the board of trustees and the actuary, the rate of increase for the contribution and the time period for full funding of this liability, which shall not exceed 40 years on initial application of this section as amended by this act, P.L.1994, c.62. This shall be known as the "accrued liability contribution." Any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for the 10 valuation years following valuation year 1991 shall serve to increase or decrease, respectively, the unfunded accrued liability contribution. Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 30 years. If an increase in the amortization period as a result of actuarial losses for a valuation year would exceed 30 years, the accrued liability contribution shall be computed for the valuation year in the same manner provided for the computation of the initial accrued liability contribution under this section.

With respect to the State, upon the basis of the tables recommended by the actuary which the board adopts and regular interest, the actuary shall annually determine if there is an amount of the accrued liability, computed under the projected unit credit method, which is not already covered by the assets of the retirement system, valued in accordance with the asset valuation method established in this section. This shall be known as the "unfunded accrued liability." If there was no unfunded accrued liability for the valuation period immediately preceding the current valuation period, the actuary, using the total amount of this unfunded accrued liability, shall compute the initial amount of contribution which, if the contribution is increased at a specific rate and paid annually for a specific period of time, will amortize this liability. The State Treasurer shall determine, upon the advice of the Director of the Division of Pensions and Benefits, the board of trustees and the actuary, the rate of increase for the contribution and the time period for full funding of this liability, which shall not exceed 30 years. This shall be known as the "accrued liability contribution." Thereafter, any increase or decrease in the unfunded accrued liability as a result of actuarial losses or gains for subsequent valuation years shall serve to increase or decrease, respectively, the amortization period for the unfunded accrued liability, unless an increase in the amortization period will cause it to exceed 30 years. If an increase in

the amortization period as a result of actuarial losses for a valuation year would exceed 30 years, the accrued liability contribution shall be computed for the valuation year in the same manner provided for the computation of the initial accrued liability contribution under this section. The State may pay all or any portion of its unfunded accrued liability under the retirement system from any source of funds legally available for the purpose, including, without limitation, the proceeds of bonds authorized by law for this purpose.

The value of the assets to be used in the computation of the contributions provided for under this section for valuation periods shall be the value of the assets for the preceding valuation period increased by the regular interest rate, plus the net cash flow for the valuation period (the difference between the benefits and expenses paid by the system and the contributions to the system) increased by one half of the regular interest rate, plus 20% of the difference between this expected value and the full market value of the assets as of the end of the valuation period. This shall be known as the "valuation assets." Notwithstanding the first sentence of this paragraph, the valuation assets for the valuation period ending June 30, 1995 shall be the full market value of the assets as of that date and, with respect to the valuation assets allocated to the State, shall include the proceeds from the bonds issued pursuant to the "Pension Bond Financing Act of 1997," P.L.1997, c.114 (C.34:1B-7.45 et seq.), paid to the system by the New Jersey Economic Development Authority to fund the unfunded accrued liability of the system. Notwithstanding the first sentence of this paragraph, the percentage of the difference between the expected value and the full market value of the assets to be added to the expected value of the assets for the valuation period ending June 30, 1998 for the State shall be 100% and for other employers shall be 57% plus such additional percentage as is equivalent to \$150,000,000. Notwithstanding the first sentence of this paragraph, the amount of the difference between the expected value and the full market value of the assets to be added to the expected value of the assets for the valuation period ending June 30, 1999 shall include an additional amount of the market value of the assets sufficient to fund (1) the unfunded accrued liability for the supplementary "special retirement" allowances provided under subsection b. of section 16 of P.L.1964, c.241 (C.43:16A-11.1) and (2) the unfunded accrued liability for the full credit toward benefits under the retirement system for service credited in the Public Employees' Retirement System and transferred pursuant to section 1 of P.L.1993, c.247 (C.43:16A-3.8) and the reimbursement of the cost of any credit purchase pursuant to section 3 of P.L.1993, c.247 (C.43:16A-3.10) provided under section 1 of P.L.2001, c.201 (C.43:16A-3.14).

"Excess valuation assets" means, with respect to the valuation assets allocated to the State, the valuation assets allocated to the State for a valuation period less the actuarial accrued liability of the State for the valuation period, and beginning with the valuation period ending June 30, 1998, less the present value of the expected additional normal cost contributions attributable to the provisions of P.L.1999, c.428 (C.43:16A-15.8 et al.) payable on behalf of the active members employed by the State as of the valuation period over the expected working lives of the active members in accordance with the tables of actuarial assumptions applicable to the valuation period, and less the present value of the expected additional normal cost contributions attributable to the provisions of P.L.2003, c.108 as amending section 16 of P.L.1964, c.241 (C.43:16A-11.1) payable on behalf of the active members employed by the State as of the valuation period over the expected working lives of the active members in accordance with the tables of actuarial assumptions applicable to the valuation period, if the sum is greater than zero. "Excess valuation assets" means, with respect to the valuation assets allocated to other employers, the valuation assets allocated to the other employers for a valuation period less the actuarial accrued liability of the other employers for the valuation period, excluding the unfunded accrued liability for early retirement incentive benefits pursuant to P.L.1993, c.99 for the other employers, and beginning with the valuation period ending June 30, 1998, less the present value of the expected additional normal cost contributions attributable to the provisions of P.L.1999, c.428 (C.43:16A-15.8 et al.) payable on behalf of the active members employed by other employers as of the valuation period over the expected working lives of the active members in accordance with the tables of actuarial assumptions applicable to the valuation period, and less the present value of the expected additional normal cost contributions attributable to the provisions of P.L.2003, c.108 as amending section 16 of P.L.1964, c.241 (C.43:16A-11.1)

payable on behalf of the active members employed by other employers as of the valuation period over the expected working lives of the active members in accordance with the tables of actuarial assumptions applicable to the valuation period, if the sum is greater than zero.

If there are excess valuation assets allocated to the State or to the other employers for the valuation period ending June 30, 1995, the normal contributions payable by the State or by the other employers for the valuation periods ending June 30, 1995, and June 30, 1996 which have not yet been paid to the retirement system shall be reduced to the extent possible by the excess valuation assets allocated to the State or to the other employers, respectively, provided that with respect to the excess valuation assets allocated to the State, the General Fund balances that would have been paid to the retirement system except for this provision shall first be allocated as State aid to public schools to the extent that additional sums are required to comply with the May 14, 1997 decision of the New Jersey Supreme Court in *Abbot v. Burke*.

If there are excess valuation assets allocated to the other employers for the valuation period ending June 30, 1998, the accrued liability contributions payable by the other employers for the valuation period ending June 30, 1997 shall be reduced to the extent possible by the excess valuation assets allocated to the other employers.

If there are excess valuation assets allocated to the State or to the other employers for a valuation period ending after June 30, 1998, the State Treasurer may reduce the normal contribution payable by the State or by other employers for the next valuation period as follows:

(1) for valuation periods ending June 30, 1996 through June 30, 2000, to the extent possible by up to 100% of the excess valuation assets allocated to the State or to the other employers, respectively;

(2) for the valuation period ending June 30, 2001, to the extent possible by up to 84% of the excess valuation assets allocated to the State or to the other employers, respectively;

(3) for the valuation period ending June 30, 2002, to the extent possible by up to 68% of the excess valuation assets allocated to the State or to the other employers, respectively; and

(4) for valuation periods ending on or after June 30, 2003, to the extent possible by up to 50% of the excess valuation assets allocated to the State or to the other employers, respectively.

Notwithstanding the discretion provided to the State Treasurer in the previous paragraph to reduce the amount of the normal contribution payable by employers other than the State, the State Treasurer shall reduce the amount of the normal contribution payable by employers other than the State by \$150,000,000 in the aggregate for the valuation period ending June 30, 1998, and then the State Treasurer may reduce further pursuant to the provisions of the previous paragraph the normal contribution payable by such employers for that valuation period.

As of the valuation report in which the funded level is in excess of 104%, an amount equal to the present value of the future normal contributions for the benefits provided by P.L.2003, c.108 as amending section 16 of P.L.1964, c.241 (C.43:16A-11.1), shall be credited to the benefit enhancement fund. If there are excess valuation assets after reductions in normal contributions as authorized in the preceding paragraphs, for a valuation period beginning with the valuation period in which the benefits provided by section 16 of P.L.1964, c.241 (C.43:16A-11.1), as amended by P.L.2003, c.108 apply, an amount of excess valuation assets not to exceed the amount of the member contributions for the fiscal year in which the normal contributions are payable shall be credited to the benefit enhancement fund. The amount of excess valuation assets credited to the benefit enhancement fund shall not exceed the present value of the expected additional normal and accrued liability contributions attributable to the provisions of section 16 of P.L.1964, c.241 (C.43:16A-11.1), as amended by P.L.2003, c.108, payable on behalf of the active members over the expected working lives of the active members in accordance with the tables of actuarial assumptions for the valuation period. No additional excess valuation assets shall be credited to the benefit enhancement fund after the maximum amount is attained. Interest shall be credited to the benefit enhancement fund.

The normal and accrued liability contributions for the increased benefits for active employees under section 16 of P.L.1964, c.241 (C.43:16A-11.1), as amended by P.L.2003, c.108, shall be paid from the benefit enhancement fund. If assets in the benefit enhancement fund are insufficient to pay the normal and accrued liability contributions for the increased benefits for a valuation period, the retirement system shall pay the amount of normal and accrued liability

contributions for the increased benefits not covered by assets from the benefit enhancement fund.

The normal and accrued liability contributions shall be certified annually by the retirement system and shall be included in the budget of the employer and levied and collected in the same manner as any other taxes are levied and collected for the payment of the salaries of members.

Notwithstanding the preceding sentence, the normal and accrued liability contributions to be included in the budget of and paid by the employer other than the State shall be as follows: for the payment due in the State fiscal year ending on June 30, 2004, 20% of the amount certified by the retirement system; for the payment due in the State fiscal year ending on June 30, 2005, a percentage of the amount certified by the retirement system as the State Treasurer shall determine but not more than 40%; for the payment due in the State fiscal year ending on June 30, 2006, a percentage of the amount certified by the retirement system as the State Treasurer shall determine but not more than 60%; and for the payment due in the State fiscal year ending on June 30, 2007, a percentage of the amount certified by the retirement system as the State Treasurer shall determine but not more than 80%.

(10) The treasurer or corresponding officer of the employer shall pay to the State Treasurer no later than April 1 of the State's fiscal year in which payment is due the amount so certified as payable by the employer, and shall pay monthly to the State Treasurer the amount of the deductions from the salary of the members in the employ of the employer, and the State Treasurer shall credit such amount to the appropriate fund or funds, of the retirement system.

If payment of the full amount of the employer's obligation is not made within 30 days of the due date established by this act, interest at the rate of 10% per annum shall commence to run against the unpaid balance thereof on the first day after such 30th day.

If payment in full, representing the monthly transmittal and report of salary deductions, is not made within 15 days of the due date established by the retirement system, interest at the rate of 10% per annum shall commence to run against the total transmittal of salary deductions for the period on the first day after such 15th day.

(11) The expenses of administration of the retirement system shall be paid by the State of New Jersey. Each employer shall reimburse the State for a proportionate share of the amount paid by the State for administrative expense. This proportion shall be computed as the number of members under the jurisdiction of such employer bears to the total number of members in the system. The pro rata share of the cost of administrative expense shall be included with the certification by the retirement system of the employer's contribution to the system.

(12) Notwithstanding anything to the contrary, the retirement system shall not be liable for the payment of any pension or other benefits on account of the employees or beneficiaries of any employer participating in the retirement system, for which reserves have not been previously created from funds, contributed by such employer or its employees for such benefits.

(13) (Deleted by amendment, P.L.1992, c.125.)

(14) Commencing with valuation year 1991, with payment to be made in Fiscal Year 1994, the Legislature shall annually appropriate and the State Treasurer shall pay into the pension accumulation fund of the retirement system an amount equal to 1.1% of the compensation of the members of the system for the valuation year to fund the benefits provided by section 16 of P.L.1964, c.241 (C.43:16A-11.1), as amended by P.L.1979, c.109.

(15) If the valuation assets are insufficient to fund the normal and accrued liability costs attributable to P.L.1999, c.428 (C.43:16A-15.8 et al.) as provided hereinabove, the normal and unfunded accrued liability contributions required to fund these costs for the State and other employers shall be paid by the State.

(16) The savings realized as a result of the amendments to this section by P.L.2001, c.44 in the payment of normal contributions computed by the actuary for the valuation periods ending June 30, 1998 for employers other than the State shall be used solely and exclusively by a county or municipality for the purpose of reducing the amount that is required to be raised by the local property tax levy by the county for county purposes or by the municipality for municipal purposes, as appropriate. The Director of the Division of Local Government Services in the Department of Community Affairs shall certify for each year that each county or municipality has complied with the requirements set forth herein. If the director finds that a county or municipality has not used the savings solely and exclusively for the purpose of reducing the

amount that is required to be raised by the local property tax levy by the county for county purposes or by the municipality for municipal purposes, as appropriate, the director shall direct the county or municipal governing body, as appropriate, to make corrections to its budget.

4. Section 16 of P.L.1944, c.255 (C.43:16A-16) is amended to read as follows:

C.43:16A-16 Funds to be established.

16. (1) All the assets of the retirement system shall be credited according to the purpose for which they are held to one of five funds, namely, the annuity savings fund, the pension accumulation fund, the retirement reserve fund, the special reserve fund, and the benefit enhancement fund.

(2) The annuity savings fund shall be a fund in which shall be credited accumulated contributions by members or on their behalf to provide for their allowances. The aggregate contributions of a member withdrawn by him or paid to his estate or his designated beneficiary in event of his death as provided in this act shall be paid from the annuity savings fund. Upon the retirement of a member where the aggregate contributions of the member are to be provided in the form of an annuity, the aggregate contributions of the member shall be transferred from the annuity savings fund to the retirement reserve fund.

(3) The pension accumulation fund shall be the fund in which shall be credited contributions made by employers. Upon the death of a member either before or after retirement any lump sum benefit payable shall be charged to the pension accumulation fund. Upon the retirement or death of a member the reserve of any pension payable to or on his account shall be transferred to the retirement reserve fund. The retirement system at the end of each fiscal year shall allow interest on the balance of the retirement reserve fund as of the beginning of said fiscal year at the regular interest rate applicable thereto to cover the interest creditable for the year. The amount so allowed shall be due and payable and shall be credited annually. All other income received on the securities, funds and investments of the retirement system shall be credited to the pension accumulation fund, except as provided by subsection (5) of this section. The retirement system, upon the advice of the actuary, shall transfer to and from the pension accumulation fund any surplus or deficit in the retirement reserve fund.

(4) The retirement reserve fund shall be the fund from which all retirement allowances and benefits in lieu thereof shall be paid. If the retirement allowance of a member who has been retired is subsequently canceled, the appropriate reserve shall be transferred to the pension accumulation fund and the annuity savings fund.

(5) The special reserve fund shall be the fund to which any earnings in excess of the amounts annually allowed under the provisions of subsection (3) of this section shall be transferred. No additional amounts shall be credited to the special reserve fund at any time when the total accumulations in such fund equal 1% of the book value of the investments of the retirement system. In this event, any such excess shall be credited to the pension accumulation fund. All losses from the sale of securities shall be charged against the special reserve fund. The special reserve fund shall be considered for valuation purposes by the actuary as an asset of the retirement system.

C.40A:4-45.43 Exemption on limits on increases for certain appropriations for pension contributions.

5. In addition to the exceptions to the limits on increases to municipal appropriations set forth in section 3 of P.L.1976, c.68 (C.40A:4-45.3) and to the county tax levy set forth in section 4 of P.L.1976, c.68 (C.40A:4-45.4), appropriations that represent expenditures made by a municipality or county for the purpose of funding normal and accrued liability contributions to the Public Employees' Retirement System of New Jersey due in the State fiscal years 2004-05, 2005-06, 2006-07, 2007-08 and 2008-09, or to the Police and Firemen's Retirement System due in the State fiscal years 2003-04, 2004-05, 2005-06, 2006-07 and 2007-08, shall be exempt from the limits on increases to municipal appropriations and to the limits on increases to the county tax levy in county budgets, respectively, for the local budget year in which those contributions are due.

6. This act shall take effect immediately.

Approved July 1, 2003.
